# AMERICA... FUCK YEAH!

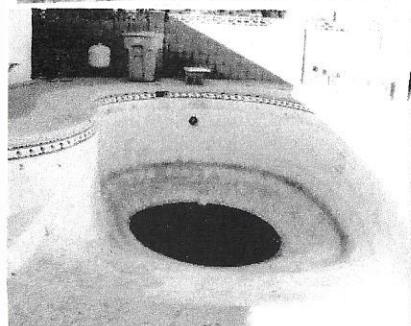

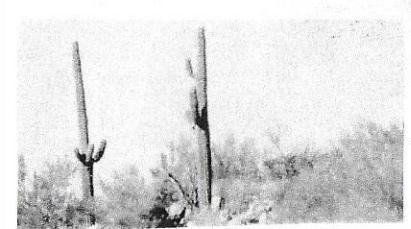

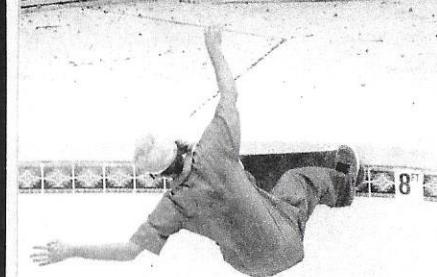

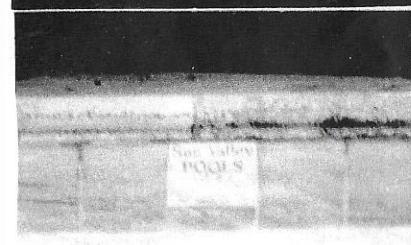

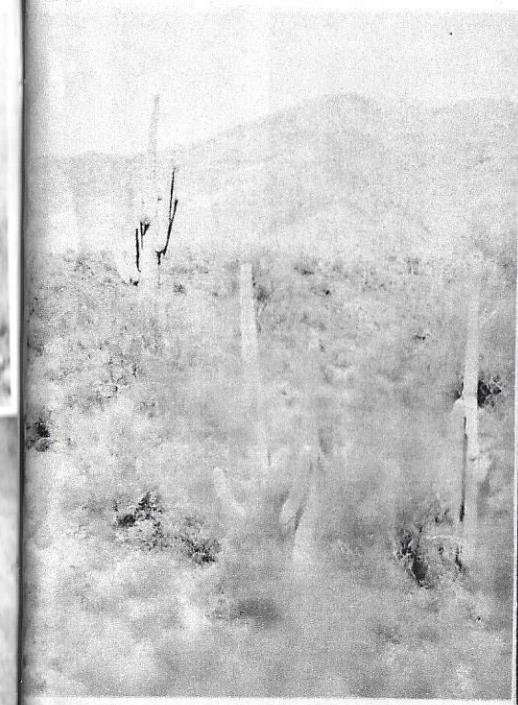

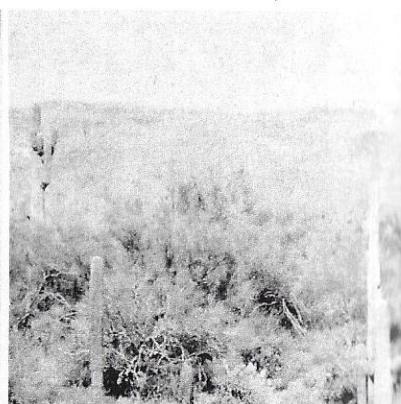

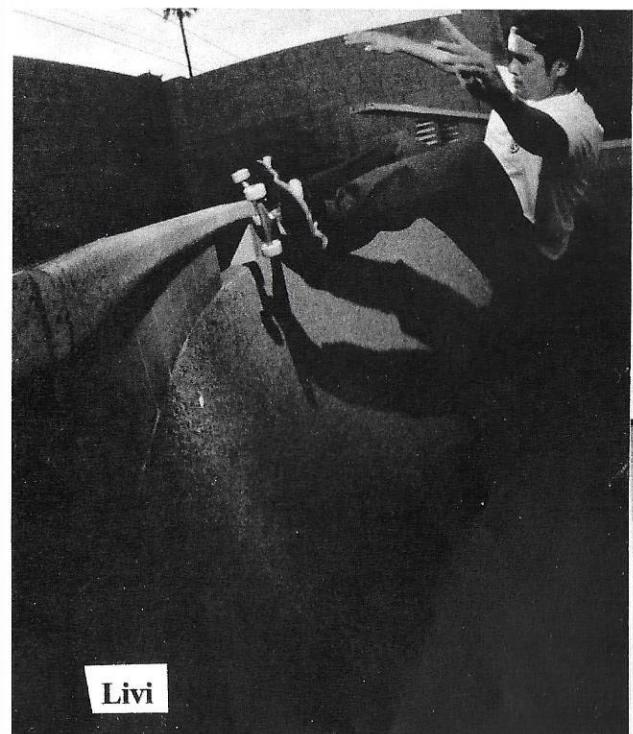

Welcome to swellbow zine number thirteen. I like to think of it as less A publication about skateboarding, but ultimately a manifesto for "pot-smoking skateboard terrorists". some shit head made a statement like that after a bombing, therefore lumping skateboarders in with terrorism. Skateboarding... American born. Freedom loving. Epitome of U.S.A.

There was another time, many years ago, that I was mistaken for a terrorist. Its that old language barrier that skaters have whilst talking amongst themselves and some prick overhears fingers and I at the bar, "lets go bomb some garages downtown after this" "fuck yea, brown palace's garage is fucking sick to bomb" and some nosy douche say's "what, you guys think yer terrorists? talking about blowin up garages".

# VAJAZZLE!

BY FINGERS

Recently I stumbled upon a fascinating new trend while trying out the internet.

This most amazing activity is called Vajazzling, the application of tiny jewels in the pattern of your choice on the pelvic area directly above the vagina. Like bedazzle, but for your pussy. The art form was originally invented at a salon in New York City, initially referred to as "bare with flair". The practice uses Swarovski crystals, a brand that specializes in the manufacture of the finest cut crystal luxury products used for decoration of the box. Fancy.

The term Vajazzling was coined by the great actress/recording artist Jennifer Love Hewitt during an interview with the atrocious comedian George Lopez (yeah, we get it you're Mexican). What a brilliant business scheme. I bet there are plenty of girls out there would just love some vajazzlement. How could this have gone unnoticed? Its obviously one of the marvels of modern history, vaginas always have needed more attention, right? Just to think of all the money to be made... the market of strippers alone is a huge facet for the market of vajazzle. The future is in LED lights that blink advertisements and can be programmed for whatever time of the year. Holidays will never be the same without old St. Nick perched atop her lady parts with that jolly come-hither smile, and maybe a clover or a lil leprechaun for march, a cornucopia for thanksgiving, or a patriotic american flag for july 4<sup>th</sup>.

Important events such as graduations and baby showers could be spiced with special messages and designs. The options are endless. How about some man-jazzzing? I could go with some disco balls, sweet!

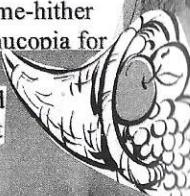

Vajazzling has become an international phenomena, and why not? It's about the coolest thing I ever heard of, and I'm just one person. Besides, its great for revitalizing failing relationships and igniting new exciting ones.

So ladies, get vajazzling because an un-vajazzled vulva just won't do!

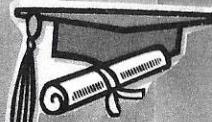

Vajazzle (vajazzles, vajazzled, vajazzling)

Noun.

1. (slang) A cosmetic treatment in which jewels are attached to to a womans vulva and/or pubic Area.

"Pumped this one from the tiles.. only to reveal this creepy shit in the drainger"- Court

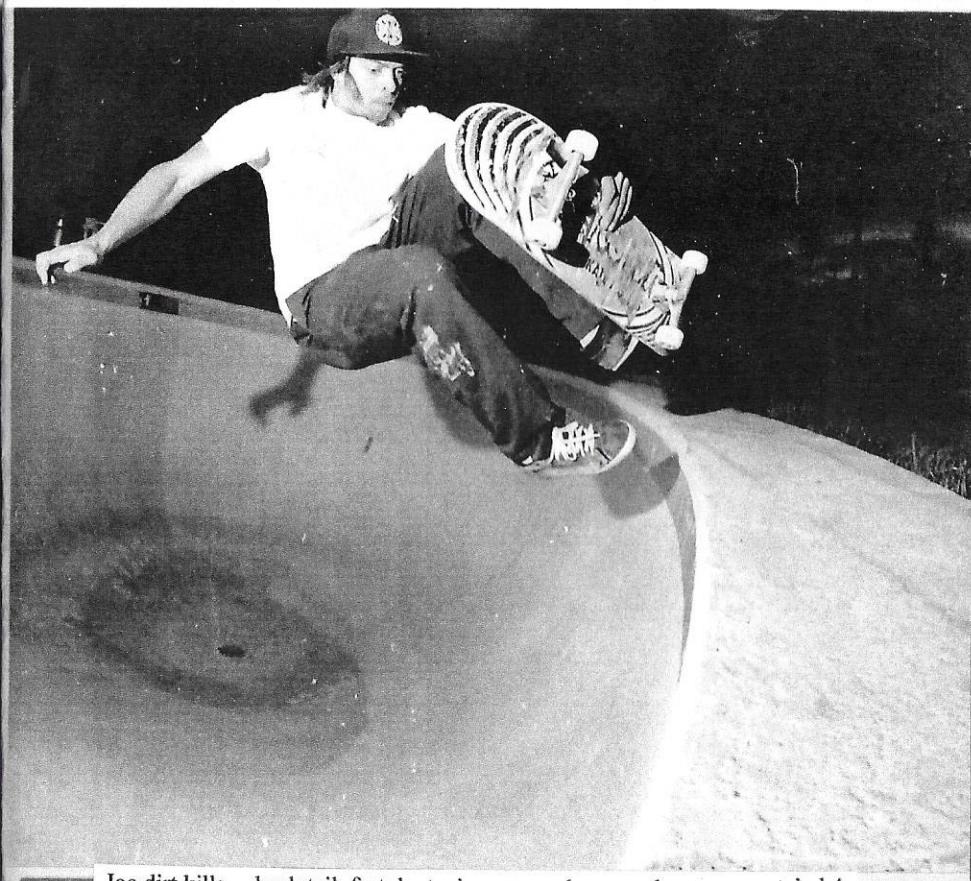

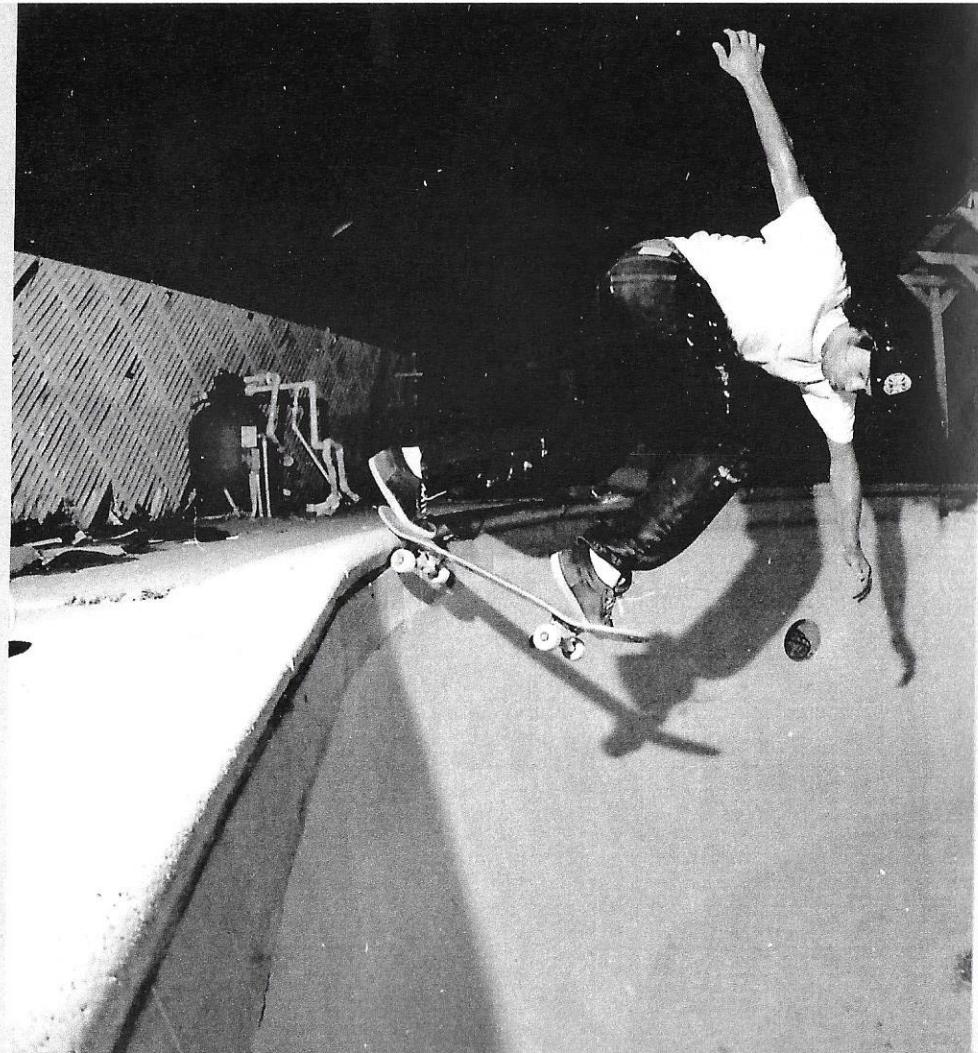

"Usually we snob squares, am jus a lil more partial to the round wall these days..but those corners looked to fun to pass on and the shallow is real buttery.. we rolled the dice.. corners are a go but nuthin nice and the seats got love but at end of the day jus gona call this mosquito control with a lil perk..then we went to see mongoloids last show..not a bad day" -Court
